Software Developer / Web Developer

Milot Verbani, a Full Stack Software & Web Developer with over three years of experience in building complete applications and functional solutions—from the initial idea to final delivery. I hold a Bachelor's degree in Computer Science and I am a certified Full Stack Web Developer.

My journey with technology didn't begin as a career choice—it started as a childhood passion. Since I was young, I've had a natural connection with computers: taking things apart, fixing them, experimenting, and trying to understand how everything worked from the inside out. That curiosity and the desire to create something that actually works has followed me all the way to today, and it continues with the same energy.

Through hands-on work, daily practice, and real-world challenges, I've developed the ability to build systems that run smoothly, look clean, and provide a seamless experience for users. I understand development from both the user interface side and the internal logic and data structure behind it, always viewing a project as a whole rather than disconnected pieces. What defines me most is how I approach my work—with persistence, curiosity, and a constant drive to grow.

My goal is simple: to continue building, improving, creating value, and contributing to projects that genuinely make a difference..

SKILLS

Programming,Language	Front-end	Back-end
Javascript,Python,C#, PHP	HTML/CSS,TailwindCss, Bootstrap,Javascript,React Js,TypeScript	PHP,MYSQL,Laravel, Asp.Net

Education

[Universum college]-Bachelor of Science in Computer Science-	2021-2024
Gjimnazi **['Skenderbeu'**]- Kacanik-	2019-2021
Shkola Fillore**['Emin Duraku']-** Kacanik-	2009-2019

Languages

Albanian	Native
English	B2
Deutschland	A2

Career History

Full Stack Software Developer -(DataProgNet-Software Development Company) May – July 2025

- Developed and maintained front-end features using React + TypeScript, ensuring responsive and user-friendly interfaces.
- Collaborated with the team to build and integrate back-end services using ASP.NET and SQL Server.
- Designed and optimized database queries to improve performance and data handling.
- Assisted in debugging and fixing bugs across the stack, improving application stability.
- Gained hands-on experience in full-stack development workflows, version control (Git), and team collaboration using Agile methodologies.

Achievements

Bachelor-Computer Science

Graduated with a Bachelor's degree in Computer Science with honors, acquiring a solid foundation in programming, algorithms, data structures, and software engineering principles.

Completed Course Full Stack Web Developer(one of the best student bootcamp 13 PËR PROGRAMERA)
Successfully completed a Full Stack Web Development Bootcamp (13), where I was distinguished by the professor as one of the top-performing students. Gained proficiency in front-end and back-end technologies, including HTML, CSS, TailwindCSS, JavaScript, React, PHP, Laravel, and MySQL.

Projects

Cafe Billing System
- A desktop application for managing café orders, invoices, and daily financial transactions.
- **Technologies:** C#, .NET Framework, SQL Server.

Learti Park
- An interactive virtual garden website offering dynamic user interaction and visual animations.
- **Technologies:** HTML, CSS, Bootstrap, JavaScript
- **Visit:** Leartipark.com

AI Chatbot
- An intelligent chatbot capable of processing natural language and generating context-aware responses using NLP models.
- **Technologies:** Python, TensorFlow, SpaCy

Online Shop
- A client-side eCommerce application featuring user authentication, shopping cart, product filtering, and local admin panel.
- **Technologies:** ReactJS, TailwindCSS, LocalStorage

Fast-Food Management System
- A food-ordering platform with real-time order tracking and automatic receipt generation.
- **Technologies:** ReactJS, TailwindCSS, JavaScript

Football Management System
- A web-based ticket booking platform with user registration, session management, and admin control panel.
- **Technologies:** PHP, MySQL, HTML, TailwindCSS, JavaScript

Rent a Car System
- A full car rental management platform with booking workflows, fleet management, and user authentication.
- **Technologies:** Laravel, MySQL, TailwindCSS, HTML , Blade

Jobs Portal
- A job-matching platform connecting professionals with employers through advanced search and filtering tools.
- **Technologies:** ReactJS, ASP.NET Web API, SQL Server, TailwindCSS, Material UI, Formik

Online Bus Booking System
- A bus ticket reservation system with schedule management and database storage.
- **Technologies:** ASP.NET, C#, SQL Server, HTML, CSS , Razor

SMT DataProgNet System
- An internal data management system with form handling and workflow automation.
- **Technologies:** ReactJS, TypeScript, ASP.NET, SQL Server
- **Visit :** smt.dataprognet-ks.com

X-Watch Product Page Clone
- A product landing page clone replicating a promotional smartwatch UI.
- **Technologies**: HTML, CSS

Gjirafa50 Clone
- An e-commerce UI clone showcasing product listings and clean UI structure.
- **Technologies:** HTML, TailwindCSS

Football Club Website
- A promotional club website with modern layout and informational sections.
- **Technologies:** HTML, TailwindCSS
